

The network of Scottish farming enterprises and resources

B McCormick*, L Giuliani, N Roxburgh†, J Macdiarmid, G Polhill†

The Rowett Institute, University of Aberdeen | †The James Hutton Institute

Aim

To (i) examine the ways in which farm enterprises are connected by resources that they use or produce, and (ii) determine how sensitive the farming system is to changes in the availability of resources. To achieve this, we used the SAC Farm Management Handbook as a description of Scottish farm enterprises and their inputs and outputs.
